“INNOVATION IN EVERY COAT”

Great Opportunity for a Senior level Chemist at Tnemec. For nearly a century, Tnemec Company, Inc. has been a leading manufacturer of coatings and coating systems for exterior and interior environments. We are looking for an individual with 8+ years of experience, management or supervisory experience.

You will be in a state of the art facility in a company that continues to invest in the Research & Development aspect of the business. We are focused on innovation and producing high quality products which anticipate and meet our customer’s needs. Our vendor partnerships are critical to our successes and extremely important to us. We have a strong reputation in the industry for our technology and research.

The successful candidate will be focused on the future and enjoy developing and being a part of the vision of the department. They will have the ability to build and deepen the already established relationships in the industry and across the company. Their focus will be not only on high quality work, but also motivating, training and developing junior chemists. Our business moves quickly and we are expected to deliver to our sales arm. It is important to understand the whole cycle of the product from infancy to application.

If you like to look at a common material and figure out a different and new use, and take the material and find creative and innovative applications, and meet our requirements, then you should apply for this position.
