

# AUTOMOTIVE FACILITY FLOOR COATINGS

## HIGH-PERFORMANCE FLOORS WITH AESTHETIC APPEAL

When it comes to making a good impression, every part of your facility counts – from the lobby and showroom to the service and maintenance areas.

Not to mention your floors. Clean, beautiful floors that shine are as important to customers as fresh pots of coffee and comfortable chairs. And thanks to StrataShield® floor coatings, a clean, beautiful floor is easier than ever to achieve.

StrataShield flooring systems from Tnemec give owners affordable coating solutions for concrete floors throughout automotive facilities. Used to beautify some of the finest showroom floors around, StrataShield also protects service areas from chemical attack caused by lubricants, solvents, fuels, and other fluids used in the industry - and makes cleanup easier, too.

Whether you're looking to enhance your showroom floor or to protect your service and maintenance areas, StrataShield systems offer the beauty you want and the durability you need.

For areas prone to a higher degree of abuse, StrataShield offers heavy-duty flooring systems for increased impact and abrasion resistance. Not only do these systems offer added protection, they also enhance your floor's appearance and provide greater resistance against chipping, gouging and scratching.

From thin-film epoxy and urethane systems to high-build laminates and mortars, StrataShield has a flooring system that's right for your facility.
